

Headstone South

Harrow Vitality Profiles - Ward Summary

The Harrow Vitality Profiles (HVPs) bring together a range of information about Harrow, its people and their needs. The latest edition, 2018-2019, is now available and can be viewed on the Harrow Council website via the following link:

<https://www.harrow.gov.uk/council/vitality-profiles?documentId=12986&categoryId=210283>

This fifth edition contains around 80 indicators which paint a picture of Harrow in considerable detail. The HVPs feature 12 topic-based sections. Information is presented on a map usually by Lower Super Output Area (LSOA), with key bullet points and explanatory text. Where appropriate, a ward bar chart and London and National comparison bar chart are also displayed. Some indicators included in the 2011-2013 edition have not been included this time as they were based on 2011 Census data, these will not be updated until after the 2021 Census. The latest edition also compares some indicators with information from previous Vitality Profiles reports or previous years where new data is available.

This ward summary uses the rankings for 75 of the HVP indicators contained in the 2018-2019 edition of the Harrow Vitality Profiles at a ward level (data was not available at ward level for the other indicators). It shows which indicators were ranked first, second, third and last in Headstone South ward.

Rankings (out of 21 wards)

1st

None

2nd

Noise Complaints (Rate per 1,000 households)

3rd
