Parts of the New 2021-2041 Local Plan seems to be responding to the forecast patterns of growth and development it is committing to in other parts of the plan. The Infrastructure Delivery Plan (October 2024) under population growth (page 7 & 8) is forecasting falling populations in 5 years and 15 years in numerous wards across the Borough, and the New 2021-2041 Local Plan does not address this. It is not clear what the population trajectory would be if the development plans being allowed in this plan were not approved. What would be the population trajectory be if the previous plan was extended until 2041 and what is the do nothing (don't apply the New Local Plan 2021-2041) population growth?. The falling populations out lined in the New Plan given all the information to date and forecasts across London would appear to be wrong. This would lead to the planning being based on the population trajectory for these areas and the Borough being wrong.

19. Do you consider this policy sound?

- Yes
- No

20. Please give details of why you consider this policy to be sound or not sound and set out the modification(s) you consider necessary to make the policy sound that you have identified (if any).

This Policy does not seem to address the information proved in the Harrow Economic Needs Study Town Centres and Office Update Final Report London Borough of Harrow 15 January 2024. The concentration of planned housing development in the Opportunity Area, bringing an even higher population density to these areas on top the present enlarged population due to recent developments with only a wish list of plans to support the transport needs of this population is a huge miscalculation.

The Opportunity area network of roads cannot support the demands being placed on it. The roads are often single lane and must take buses, private cars, delivery vehicles and emergency vehicles. Any slight problem on the roads has an immediate impact that extends widely. The impact on adjacent areas is also detrimental. The Council is currently consulting on implementing parking controls on areas close to recent housing developments as the car free agenda fails for these developments, and new residents bring their cars and park as conveniently as possible to their new homes, but not on the development where is parking is strictly controlled by private parking enforcement contractors.

The London Borough of Harrow Infrastructure Delivery Plan (IDP) October 2024 also seems to be indicating that there are electricity capacity issues with electricity supply for forecast increase in Electric Vehicles (and new developments). Transport is given a Green rating in the document but Energy and Utilities has an Amber rating.
