It is unfair to keep on directing growth to the Opportunity Area, which is already overcrowded and has already provided thousands of flats. Growth should be evenly spread out so everyone has a more comfortable life.
Please do not keep on increasing capacity for the Opportunity Area.

Parking is a problem in the Opportunity Area. Although the policy suggests that developments near transport hubs will be carless, this doesn't actually happen.
Take Eastman Village for example: most residents do not have an allocated car parking space, however they end up parking in the nearby roads causing existing residents to park far from their own properties.

There are major concerns about health and social care facilities which have been found to be inadequate for the current population, let alone thousands of new residents.
GPs, Hospitals, clinics are already oversubscribed. Appointment are difficult to secure.
Your report on the infrastructure identifies problems with no real solution or funding.

There are issues with electricity and water supply, which also do not have proper solutions

Please secure proper infrastructure before building any more flats.

The policy is encouraging HMOs and Shared Living Facilities in the Opportunity Area, which do not provide family housing and may cause a decrease in community cohesion. This will also be contained to the Opportunity area, which has already suffered through years of such developments. These need to be spread across the borough, not just the Opportunity Area.

The Opportunity Area is now overdeveloped. There should be no more high rise development in this area. We need proper family homes, not flats. Previously, we were told that the Station Road area was to remain low rise. The only reason it was included in the Opportunity Area was for improvement of public areas. Now you want to build high density developments which do not improve connectivity between the 2 town centres and make traffic and congestion worse.
Please leave the Station Road Area as low rise as was originally promised.

The consultation has been poor and exclusionary.
It takes a long time to read the jargon filled documents. How are ordinary residents supposed to engage?

The form is also very difficult to fill in. There are over 60 policies to choose from, many of the interrelated. Is there no way to response to many at a time?
